

WHERE IT ALL STARTED - THE CRADLE OF WIND POWER

DUWET: Danish University Wind Energy Training is a competence centre for research-based training within the area of wind energy development.

Bringing together leading competencies in wind power technology, research and development, markets and finance.

Company information

DUWET was founded in 2007 as a joint operation between Risoe DTU, Aalborg University and Aarhus University. DUWET is operated and managed by Aarhus University, Institute of Business and Technology.

DUWET offers courses and training programmes addressing all aspects of wind power.

Services

- 3 different wind energy basic courses
- Several different wind energy advanced courses for R&D engineers
- A course on intercultural communication competencies
- Specially designed company courses as in-house training tailored for our customers
- Keynote speakers for conferences
- Consulting in wind turbine R&D, siting and energy systems.

Course Catalogue

You can always download the latest version of our course catalogue from our homepage www.duwet.dk, where you can also find more information about our courses, course fees and instructors. You can register for our courses directly on our homepage or you can just send an email to duwet@duwet.dk.

Customers

- Wind turbine manufacturers
- Subcontractors for the wind energy industry
- Wind energy advisers and consultants
- Energy corporations and developers
- Students in wind engineering
- Etc.

International

DUWET's courses normally take place in DK - 7400 Herring, but all courses can be arranged anywhere in the world the customers want. We can tailor company courses to specific company needs such as location, date and contents.
