

A stakeholder list of the main Danish actors operating within the water/environmental sector in China*

State of Green is a non-profit public-private partnership owned by the Federation of Danish Industry, Danish Energy, Agriculture and Food and the Wind Industry. State of Green aims to highlight the Danish competencies and solutions in the energy, climate change adaptation, water and environment internationally. Danish water companies have the opportunity to create a free exhibition profile on the web portal www.stateofgreen.com. It is also possible to become a part of the State of Green Tours and receive visits from selected foreign delegations. In 2014, State of Green assumed responsibility for continuing and the tools that were developed during Rethink Water project, including a series of white papers focusing on current global issues in the water sector - read more on www.rethinkwater.dk

<p>The Trade Council China offer highly qualified consultancy by local and Danish sector experts located throughout China.</p> <p>Trade Council China has offices in Beijing, Shanghai, Guangzhou, Chongqing and Taipei while also covering Hong Kong.</p> <p>Danish companies have either sourced in China or moved their production to China. The Trade Council has worked with these companies from the beginning and thus possesses extensive experience in identifying the right partners etc. in China.</p> <p>The Trade Council's Green Team has in-depth knowledge of the political framework through our valuable network with public institutions and the market actors. Government relations are very important in China and our unique access to the right people and information represents one of the key competencies.</p>	<p>CLEAN is a nonprofit association that facilitates cooperation between the public sector, private sector and research institutes with tangible outcomes for all parties involved.</p> <p>Business development in relevant export markets and development of total project solutions in selected markets and Asia areas.</p> <p>Financing solutions for export projects - from pre-evaluation into concrete contract negotiations with the customer.</p> <p>As a nonprofit entity, CLEAN does not directly "close deals" and negotiate commercial contracts, rather we create collaborations that ultimately lead to deals being closed and solutions being implemented.</p> <p>The Association has 170+ members and is governed by a Board of Directors with representatives appointed by our core members.</p>	<p>Commercially network that provides contact to other exporters in the industry, and dissemination of knowledge. Objective is to strengthen members' export sales.</p> <p>Fast and efficient access to decision makers in the markets.</p> <p>Organizing of:</p> <ul style="list-style-type: none"> • Export promotion • Joint Stands on int. exhibitions • Common export marketing • Membership meetings with industry relevant lecturers. • Work to facilitate export activities like delegation trips for Danish companies. <p>Private, nationwide-known non-profit association, about 590 members (68 water) ranging from small to very big companies divided into 14 branch network.</p> <p>Danish Water Technology Group China is a sub-group of DWTG with own network and office in Shanghai.</p>	<p>Confederation of Danish Industry (DI) is a private organization funded, owned and managed entirely by 10,000 companies within manufacturing, trade and service industry.</p> <p>DI's activities could be categorized as follows:</p> <ul style="list-style-type: none"> • Policy advocacy - at local, national, and international level • Membership services - information, advisory services, and consulting • Network relations - between members and with society at large • Export promotion activities <p>Danish Cleantech Hub Shanghai is an international public-private partnership operated by Confederation of Danish Industry and State of Green.</p>	<p>Danish Chinese Urban & Regional Cooperation (DACURC) is a forum for currently around 40 Danish actors with bilateral contact to Chinese authorities, e.g. Municipalities, Regional Authorities like Central Region and Capital Region of Denmark and various NGO's.</p> <p>It functions as a platform for networking, the advancement of competences and sharing of experiences on relations with Chinese authorities in commercial matters. The forum was established in 2013 by the Danish Ministry of Housing, Urban and Rural Affairs.</p>	<p>Danish Soil Partnership is an initiative taken by the five regional councils of Denmark in dialogue with the industry and the research institutions.</p> <p>The intention is to facilitate green business while solving the challenge of Contaminated soil.</p> <p>Combined, the five regions is the greatest actor on the Danish market. By applying intelligent public demand, the region can contribute to green business cases while working for a cleaner environment home and abroad.</p>	<p>The Partnership was established in November 2010 and is a co-operation between the Danish Ministry of the Environment, the Geological Survey of Denmark and Greenland (GEUS) and the Royal Danish Embassy in Beijing. The Partnership will provide a platform for Danish companies to test new technology within the Chinese groundwater area. The Partnership has chosen to start with activities in the Shandong Province in China.</p>	<p>Under this programme a partnership concerning China-wastewater shall be established and operated during the period of 2016-2018 by a Danish Project Holder. Danish Export Association (Danish Water Technology Group (DWTG) has been selected to carry out the assignment. DWTG will be assisted by DEA Shanghai.</p> <p>The partnership will form the focal point of a business cooperation aimed at relationship building, project development, export promotion and market creation in the wastewater segment.</p> <p>During the project period a comprehensive sectoral program of cooperation between Denmark and China on wastewater will be established by the Nature Agency which operate in close connection to the wastewater partnership.</p>	<p>Water in Urban Areas was originally established in 2010 as a strategic partnership. From the end of 2014, Water in Urban Areas has transformed from a strategic partnership to an innovation network. The uniqueness of Water in Urban Areas is that the network consists of both knowledge institutions, government agencies, utilities and private companies (tetra-helix structure).</p> <p>Development and demonstration/testing of innovative technologies, know-how and services in an interdisciplinary and organizational cooperation to develop new markets in and outside Denmark. Development and demonstration/implementation of innovative methods for the benefit of business and society's capacity for innovation based on climate adaptation of Danish cities</p>	<p>China and Europe have agreed to establish a platform for dialogue, joint research and private sector cooperation on better management of water resources.</p> <p>The Platform was established in 2012 and is lead jointly by the Chinese Ministry of Water Resources and Denmark/Portugal on behalf of the EU.</p> <p>The Nature Agency of Denmark is responsible for the European secretariat. In this role cooperate the Nature Agency coordinates closely with the Chinese Ministry of Water Resources.</p> <p>Denmark has undertaken to be responsible for the Chinese-European dialogue partly on groundwater, partly on integrated urban water and wastewater management.</p>
